

# **Electrical Engineering Program Educational Objectives**

## **Division of Electrical & Computer Engineering Louisiana State University**

approved February 2021

The electrical engineering program at Louisiana State University strives to prepare students to pursue successful professional careers in a global marketplace and/or pursue advanced degrees. The following program objectives focus on achievements of our graduates within three to five years of graduation.

- Graduates will have demonstrated the ability to engage in life-long learning through advanced education/degrees, professional development activities, or other career-appropriate options.
- Graduates employed in the electrical engineering industry will have demonstrated ability to succeed in their organizations through their leadership, technical skills, effective teamwork abilities, communication capabilities, and other manifestations of their capability.
- Graduates who choose to attend graduate school will have succeeded in their studies in graduate school.
