Student/Faculty Lunch: Enhancing Aircraft Safety—A Multi-University Research Project

Jorge Aravena

**Department of Electrical and Computer Engineering
Louisiana State University**

Abstract—This project, led by LSU and based also at UNO and ULL, is developing new techniques to perform early detection of abnormal performance in airplanes and to reconfigure the flight control systems accordingly. It is expected that the results will enhance the safety of the commercial fleet.

When: Thursday, 24 February 2005, 12:00 - 13:00

Where: TBA
