The CAMD Microfabrication Opportunity

Pratul K. Ajmera

**Department of Electrical and Computer Engineering
Louisiana State University**

Abstract—The Center for Advanced Microstructures and Devices (CAMD) offers some interesting capabilities for microfabrication. This talk provides a background to what these opportunities are and is addressed at a level that undergraduate and graduate students can understand. Both the sub-micron nanometer structure fabrication and the high-aspect ratio microstructures are considered. Some examples of the research work carried out at CAMD are given.

Date: Thursday, 4 February 1999, 11:00 - 12:00

Place: Room 117 EE Building

Info: <http://www.ee.lsu.edu/seminar>

Food: *Refreshments will be served.*
