The Role of Power Engineers in the Design of Industrial Facilities

Gregory Clement, P.E

Fluor Corporation

Abstract—Mr. Clement is a 1998 graduate from the LSU ECE Department. The talk will provide students with an overview on the type of work they can expect to perform should they choose to pursue a career in power distribution. The presentation is geared towards students interested in the power generation and distribution; however, it may also provide insight to the industry (EPC) for the students not interested in power.

When: **Wednesday, 14 September 2011, 16:30 - 17:30**

Where: **Room 149 EE Building**

Info: <http://www.ece.lsu.edu/seminar>
